PACKAGING FOR AGRICULTURE

Catering to the Apple Orchards, Roadside Stands and Farms of the Northeast and beyond.

WE SPECIALIZE
IN PERSONALIZED PACKAGING CONCEPTS

The Rite Package Company has proven again to become the most trusted, innovative and responsible packaging company influencing the agricultural community in the United States. With our newly invented line of ***biodegradable, reusable, recyclable & compostable*** *products brought to the northeast at the right price, we are ready for another growing season. Thanks to our satisfied customers, we proudly state "We are still here, bigger and better than ever". Sincere thanks for past loyalties and we look forward to helping you this season.*

IMPORTANT DATES

Because of the supply demands, I ask you to be proactive and order now avoid being reactive! Call me so we can schedule your products for custom or stock orders

APPLE PACKAGING

- Biodegradable Paper Poly Lined Apple Bags
- Paper Apple, Peach, Orange Bags
- Plastic Apple Bags
- Poly Bags #3 and #5
- PYO Apple Bags
- Drawstring Bags
- Apple Baskets
- Poly Liners
- Apple Cider Labels
- Apple Cider Shippers
- Gift Pack Shippers
- 12-3 Shippers
- Bag Closing Machine and Tapes
- Apple Pie Boxes
- Wood Field Crates
- Wood Bushel Boxes
- Corrugated Retail

BIODEGRADABLE VEGETABLE PACKAGING

- Corn Bags Header and Wickets
- Corn Bags T-Shirt
- Vegetable Hanger Pack
- Roll Bags
- Pull N Pack Roll Bags
- Market Baskets
- T-Shirt Carry Out
- Lettuce Bags
- Kraft Paper Bags
- Poly Bags
- Corn Mesh Bags
- Potato Bags
- Carrot Bags - 25# Unprinted
- Split Veneer Display Baskets

FREE Dispensers

Fully biodegrabable and compostable and as such, can be reused for the separate collection of organic waste

Made with compostable material which is:
- Certified compostable in municipal composting facilities
- FDA Approved
- Cedar Grove Accepted
- Can be used with any waste disposal system
- Certified under ASTM D-6400 for the United States

For best results, we recommend use of this products within one year when stored under normal environmental conditions (regular humidity - not desert or arid dryness).
Avoid storage in extreme temperatures & prolonged exposure to water or liquids, flames or oxidizing agents.

Derived from renewable agricultural raw materials and non-genetically modified starch. It can biodegrade in composting, soil, fresh and salt water and meets ASTM D6400. Additionally, the compostable material used has the OK soil bio-degradable certification and can be used in home compost operations and has the OK home compost certification.

Will plastic decompose?

Plastic waste is one of many types of wastes that take too long to decompose. Normally, plastic items can take up to 1000 years to decompose in landfills. But plastic bags we use in our everyday life take 10-1000 years to decompose, while plastic bottles can take 450 years or more.

Why is plastic non biodegradable?

Peptide bonds, which link carbon to nitrogen, are found in proteins and many other organic molecules. Environmentalists might wonder why plastic manufacturers don't use peptide bonds to build polymers rather than carbon-carbon bonds, so that they'll biodegrade rather than lasting forever in a landfill.

A peptide bond is an amide type of covalent chemical bond linking two consecutive alpha-amino acids from C1 of one alpha-amino acid and N2 of another along a peptide or protein chain. It can also be called an eupeptide bond to separate it from an isopeptide bond, a different type of amide bond between two amino acids.

Is there such a thing as biodegradable plastic?

Under proper conditions, some biodegradable plastics can degrade to the point where microorganisms can completely metabolize them to carbon dioxide (and water). For example, starch-based bioplastics produced from sustainable farming methods could be almost carbon neutral.

Are any plastic biodegradable?

Incinerating non-biodegradable plastics will release carbon dioxide as well. Disposing of non-biodegradable plastics made from natural materials in anaerobic (landfill) environments will result in the plastic lasting for hundreds of years. Bacteria have developed the ability to degrade plastics.

How long does it take for biodegradable plastic to decompose?

Biodegradable plastics take three to six months to decompose fully. That's much quicker than synthetic counterparts that take several hundred years. Exactly how long a biodegradable bag takes to break down depends on various factors, such as temperature and the amount of moisture present.

Are biodegradable bags better?

Biodegradable plastic bags. To put it simply, something is biodegradable when living things, like fungi or bacteria, can break it down. ... Plus, if biodegradable bags are sent to landfill, they break down without oxygen to produce methane, a greenhouse gas with a warming capacity 21 times more powerful than carbon dioxide.

Are single use plastic bags biodegradable?

The plastic bag ban prohibits retailers from providing single-use, lightweight polyethylene plastic bags (less than 35 microns). This includes degradable plastic bags (as opposed to compostable biodegradable bags made from plant starch).

Is PE biodegradable?

Polyethylene or polythene film biodegrades naturally, albeit over a long period of time. Methods are available to make it more degradable under certain conditions of sunlight, moisture, oxygen, and composting and enhancement of biodegradation by reducing the hydrophobic polymer and increasing hydrophilic properties.

Is bio based the same as biodegradable?

And, not all biodegradable plastics are biobased. Biodegradable plastic degrades through exposure to naturally occurring microorganisms. ... All organic matter will eventually biodegrade. This includes traditional petroleum-based plastics.

Is biodegradable plastic really BIODEGRADABLE?

Unfortunately, recycling your 'biodegradable' plastics isn't a great answer to this issue. ... However, while some bioplastics can be composted and do not harm the quality of compost, others leave toxic residues or plastic fragments behind, making them unsuitable if your compost is being used to grow food.

What is the difference between biodegradable and compostable?

The primary difference between compostable and biodegradable is that compostable products require a specific setting in order to break down, whereas biodegradable products break down naturally. Typically composting is a faster process, but only under the right conditions.

BIODEGRADABLE & NON BIODEGRADABLE PYO APPLE BAGS

BRANDING IRONS

Our screw tip style branding irons are made for medium to heavy duty branding applications and can fit a much larger die than the plug style irons. Maximum die to heater contact and very efficient heat transfer is guaranteed by a tapered seat which is unique.

Features:

Nickel wound heating element insulated with high dielectric Mica wound on a conductive Brass core. All elements are built with a +/- 2% resistance tolerance, fully burnt-in to stabilize wattage, and dielectric-tested at 1200V in order to allow consistent idling temperatures, fast recovery, and long life.

Burn resistant, extra-flexible, neoprene power cord with wattage identification will withstand accidental contact with iron at operating temperature.

Three-wire, grounded construction for operator safety.

Heat deflector discs for added handle cooling

Tapered die seat allows for maximum thermal contact

Corrosion Resistant Nickel Plated Hexagonal case

"S-12" Iron Holder included

Temperature Controller

Compostable Sleeves

POUCH POLYPROPYLENE BAGS WITH HANDLE – Vented

4 Different in stock sizes to choose from

Key Pouch Features:

- Increased sales volume - larger ring-out due to increased weight of packaged produce
- Food safety - prevents contamination from consumer handling
- Reduces shrink - decreases product spillage and product from being over picked
- Freshness retention - macro perforation prevents condensation and helps extend shelf life
- Laminated structure - keeps the pouch clearer
- Better merchandising - bottom gusset helps pouch stand on shelf upright and prevents spills
- Resealable zipper - lets consumers reclose package to maintain freshness
- Convenience - provides a grab-n-go concept for busy shoppers

LET US DESIGN A CUSTOM LOGO/LABEL FOR YOU

The Rite Package Company works closely with a specialized flexographics art department that has over 90 years of combined experience of creating art for a wide range of customers, from the small grower to well known larger growers.

Our artists are a diverse group with backgrounds specific to agricultural illustration allowing us to meet all of our customer's pre-press needs. Backed by state of the art plating abilities, we provide our customers with the finest quality products.

We work directly with our clients to ensure that nothing is lost through this translation, whether our client is local and stops in with their jobs, or is located across the country, via email, fax and phone.

We pride ourselves in providing our customers with quality customized service and technical support.

Please contact the Rite Package Co. for your nutritional labeling program.

Warning Labels for Cider

Frequently Asked Design Questions:

Q: What file formats do you use to produce my job for plates or dies?
A: A PDF file if properly setup, is the most efficient format. If you haven't set your colors to output properly, such as having 2 of the same color, RGB, or having spot colors set as process, we can't easily change this and we would need another file, or have to charge you time to fix the supplied PDF.

Q: What if I don't know what you need to do to a file, which format should I send?
A: If possible, we prefer a vector fomat file, such as an Adobe Illustrator file, .ai, a vector .eps. Even a PDF saved with "Illustrator Editing Capabilities" would work well. Converting fonts to outline and including all support files is always a great idea as well.

Q: All I have is a Photoshop file, jpeg, or Tiff, can you use that?
A: Those formats are typically used to send us Photos, or Full Color Graphics that need to be printed in 4 color process. If the file is sent as a "grayscale" format, it can output at one color, but it will be screened as a halftone in any areas that are 100% dot. There's always exception to these rules but better safe than sorry when sending files for your jobs.

Q: What resolution should my files be?
A: If you can only send us a .psd, .bmp, .tiff, or .jpeg, please call us to make sure that it will work for the type of printing plate you are ordering. If it is a bitmap, please use at least a 600 dpi file, 1200 dpi is better and will show more detail and cleaner lines.

Q: How do we send files to you?
A: Email, FTP, and obviously CD, DVD. Please call or email for FTP information

Q: What is your typical turnaround time?
A: That really depends on the job. In many cases we can arrange to ship your plates/dies same day if received early enough in the day. If your files are sent properly and ready to output, our usual turnaround time is 24 hours.

Please call us today to speak with us about your job ~ 888-842-2183

NOTES

General Information

1. **MINIMUM ORDER**
   Rite Package's vendors for various products want minimum orders. We sometimes are able to combine orders to obtain these minimums. Please call us for details.

2. **OVER-RUNS/UNDER RUNS +/-10%**
   On custom print bags and labels, industry standards permit +or - 10%. Overruns will not exceed 10%. Under runs within 10% will be considered complete. You will be billed for the amount shipped. On custom print apple bags, standards for one of our vendors is + or - 25%. As above, you will also be billed for the amount shipped.

3. **PICK-UP ORDERS - 24 HOURS ADVANCE NOTICE**
   There are pick-up orders only at our vendor locations. Pick-up orders MUST be called in or faxed in the day before you intend to pick up your stock merchandise.

4. **FREIGHT TERMS**
   Since we ship from various strategic locations. FOB's will be shipped from those locations. All orders are shipped prepaid and added to the invoice. We will get freight quotes for you.

5. **RETURNED CHECKS**
   There will be a $50.00 fee charged for all returned checks.

6. **RETURN POLICY**
   No merchandise is to be returned without first obtaining an authorization from The Rite Package Company. Please include merchandise, date of delivery, date of delivery, trucking company making delivery, and reason for return. A restocking fee of 15% plus all shipping charges associated with the order will be charged on all returned products when the error is not the fault of The Rite Package Company.

7. **PRINTING PLATE CHARGES/ARTWORK FEES**
   We are retail specialists that can make custom printing a possibility for you. The cost of the printing plates and artwork we purchase for you will be added to your invoice. We can let you approve color or black & white proofs through computer diskette, fax, by the mailing services, or in person with our sales staff. Our staff would be happy to quote your custom art. We have artists who have specialized in the agricultural field for 30 years. We are more than happy to help.

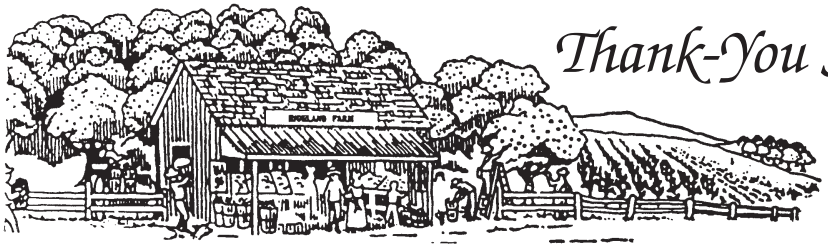
8. **OFFICE HOURS - 8:00 to 5:00, MONDAY - FRIDAY**
   We may be reached during these hours. Our 800 number reaches all of the United States. Call 1-888-842-2183 toll free. Fax 1-508-943-4514. Email: theritepackageco@aol.com

9. **CUSTOM PRINT LEAD TIME**
   Stated lead times are approximate and are figured from time of our receipt of your finished and approved artwork.

10. **PAYMENT TERMS**
    We accept: Check-In-Advance, MasterCard/Visa and net 30 credit* accounts. Some of our products are direct shipped from the manufacturer.

* We will be glad to extend you credit. If you own a farm - you may have credit with us, pending a credit check. Payment in full will be due in 30 days from receipt of product.

NOTE: Prices are subject to change without notice! Please order early as some items are available only in season or on a "Booking Order Basis".



Thank-You So Very Much!
